Making your service more reliable with technology

What if you could prevent a problem before it happened? New cutting-edge technology is helping us do that with your electricity. We continue to strengthen the electric system with smart technology that can reroute power around trouble spots, limiting the number of customers affected by a power outage. It also helps us repair the problem and get your lights back on faster at your business.

See how this is making your service even more reliable: » FPL.com/reliability

Change the current way you fuel your fleet

Want to test drive an electric vehicle? Meet other companies who have already made the switch? Or, learn about the benefits of plugging in? Then, join us as we help celebrate National Drive Electric Week Sept. 15-21. Find an event near your business:

Energy Answers

Q Will it help to turn my air conditioner off every night to save on my electric bill?

- *Josette S. from North Miami Beach*

A Whenever you turn off your A/C or raise the thermostat, you'll always save money. Even if your cooling system has to play "catch up" in the morning when you bring the temperature back down, it is still more economical than keeping an unoccupied building cool all night long. Storm charge adjustment

You will see a decrease in the storm charge portion of your bill as part of a routine adjustment effective this month. This charge, which helps pay for previous hurricane restoration costs, is adjusted periodically during the year following Florida Public Service Commission review and approval. The storm charge, effective Sept. 2, will be \$1.56 per 1,500 kWh for small, non-demand business customers. View information about your specific rate class:
