FOR YOUR HOME & FAMILY

# Committed to a **brighter** future

Every morning, when the sun rises across Florida, many FPL employees head to work with one goal in mind: to bring you clean solar energy.

For employees like Chanda Young Brown, her commitment to using Florida's very own sunshine to make a difference is more than just her job – it's her passion.

Chanda's journey at FPL has provided her with many opportunities – from starting as an intern to her current role as a construction project manager. But, it's being part of a company that is committed to advancing solar energy that has captivated her.

"Having the opportunity to support the construction of one of FPL's new solar plants was awesome. My team and I managed the installation of distribution power, which basically means we helped get the energy generated from the solar plant to the local

community for its use.

It was an exciting project, and I'm really proud to be part of a team that's at the forefront of solar energy," said Chanda.

Chanda's dedication is just one example of our commitment to a clean energy future.

"If we all work together, we can make more solar energy happen for Florida," Chanda added.

We're excited to continue investing in clean energy – like solar. Yet, we're even more excited to share the stories of our employees, and your neighbors. After all, it's people like Chanda who are our special source of energy that ultimately keep your power on.

As of July, you will begin receiving Energy News on a quarterly basis.

## Ask the Energy Expert

**Q** How much does it cost to run my pool each month?

— Adam C., Boca Raton

**A** Your pool is your home's second largest energy user. So, this is a great question! But, there isn't a one-size fits all answer. It depends on the size of your pool, type of pool pump, heater and how long you run your pool. Get the full answer:

## The power to cleanup Biscayne Bay

Every year, FPL employees, along with family and friends, participate in one of Miami-Dade County's greatest environmental events – Baynanza. This fun-filled, community-wide celebration of environmental awareness culminates with Biscayne Bay Cleanup Day, a volunteer effort to remove debris from Biscayne Bay, one of South Florida's most precious natural resources.

## Partnering for the future

Building on our long-standing commitment to education, we are proud to announce a partnership with the Phillip and Patricia Frost Museum of Science – in Downtown Miami's Museum Park. Explore a planetarium, aquarium, science museum and unique solar installations, all on a single campus. For a limited time, receive 10 percent off Family and Family PLUS level memberships – use offer code **FPL10** to redeem your discount. For a full list of benefits, visit: » [Frostscience.org/membership](http://Frostscience.org/membership)

## What powers Florida homes

We use mostly U.S.-produced natural gas and zero-emissions nuclear and solar to generate the energy you use in your home.

Sources of electricity generation for the 12 months that ended on Feb. 28, 2017

Major energy sources and percent share of total U.S. electricity generation in 2016

## New streetlight tariff

The Florida Public Service Commission recently approved a new, optional LED streetlight tariff as a three-year pilot program. The tariff provides competitive pricing and additional lighting options for local governments, homeowners associations, businesses and other customers. For more information:
