

Celebrating Florida's Solar Energy Future

Ten years ago, we built the FPL DeSoto Next Generation Solar Energy Center, which was the largest photovoltaic solar power plant in the nation at the time. Today, we operate 18 solar power plants across Florida, generating clean energy for all of our customers. What a difference a decade makes!

Through one of the largest solar expansions in the U.S., we continue to add even more solar at a rapid pace while keeping bills among the lowest in the nation. Right now, we're hard at work on 10 new solar power plants that are just months away from completion.

In addition, we recently announced plans to create the largest community solar program in the nation. If approved by the Florida Public Service Commission, FPL SolarTogetherSM would allow you to be a part of the Sunshine State's clean energy future.

Be among the first to get program updates. Visit: [» FPL.com/solartogether](https://www.fpl.com/solartogether)

A herd of sheep at the FPL Blue Cypress Solar Energy Center maintain the grounds, helping keep the grass low.

Rates and storm charge update

Current FPL electric bills do not include a storm surcharge. This rate decrease took effect in August 2019. In addition, a small one-time refund is expected to be applied to a future bill, pending Florida Public Service Commission approval. Learn more: [» FPL.com/rates](https://www.fpl.com/rates)

Everyone pays for electricity theft

Billions of dollars in electricity are stolen each year, making electricity the third most stolen product behind credit cards and automobiles. Stealing electricity is a felony. It can result in injury or death, and can lead to jail time and staggering financial consequences.

We work hard to serve all of our customers in the most cost-efficient manner possible. When someone steals electricity, it is both extremely dangerous and adds to our cost of doing business which drives up everyone's bills. Help stop thieves from driving up your energy bills.

If you see something – report it anonymously, call 800-528-6621.

Power line safety tips

You can be seriously injured or worse if you or an object you are holding touches a power line. Stay more than 10 feet away from neighborhood power lines and at least 30 feet from larger higher-voltage lines. Hire a qualified professional to trim trees near power lines. Assume all lines are energized. Call 811 before you dig or visit [Call811.com](https://www.Call811.com) at least two business days before to avoid underground lines.

Tools to help you save

We offer several programs that can help you save energy and money. Here are just a few of our services:

- » The FPL Energy Analyzer is a free tool that provides an estimated breakdown of how much you're spending on appliances, cooling, and heating. You'll also receive expert tips and recommendations to help you save on your bill. Visit: [» FPL.com/EnergyAnalyzer](https://www.fpl.com/EnergyAnalyzer)
 - FPL also offers a free in-home evaluation. Our energy expert will visit your home to identify energy-saving opportunities and rebates available that can help improve your home's energy efficiency. Call 800-DIAL-FPL (800-342-5375)
- » Computer Assisted Survey: An in-home evaluation at a cost of \$15. We estimate potential savings, installation costs, and the payback period for each recommendation.

A Building Energy Rating System survey is also available. It rates your home according to the current Florida energy-efficiency code requirements for new home construction and may help you qualify for improved mortgage options or increase your home's resale value.

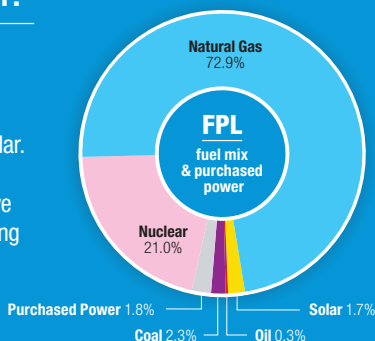

- » New or existing homes can apply for a Class 1 or 2 rating survey, which involves an on-site inspection. The cost for homes up to 2,000 square feet* is \$480, or \$555 with an air-conditioning duct leakage test, which includes one handler. An incremental \$35 is charged for each additional handler.
- » At a cost of \$75, the Class 3 rating option is for new construction only and is based on site plans and construction documents.

* For Class 1 and 2 surveys, there is an additional charge of 8 cents per square foot for homes greater than 2,000 square feet, or 3 cents per square foot for a Class 3 survey.

Where does your energy come from?

FPL's power comes from a variety of sources, including clean-burning natural gas and emissions-free nuclear and solar. We've substantially increased our investment in cost-effective solar while significantly reducing our use of coal.
